Patient DOB: 04/29/1978
Referring Physician: CORI MILLEN, DO
Location: Golden Lakewood
MRN: 973918

MR VENOGRAM OF THE BRAIN WITHOUT INTRAVENOUS CONTRAST

EXAM DATE AND TIME: 3/24/2021 5:00 PM

INDICATION: Headaches. Pressure behind the eyes. Tinnitus. Venous stenosis.

TECHNIQUE: MR venogram of the intracranial structures was performed using standard time of flight technique.

COMPARISON: Brain MRI 4/28/2020

FINDINGS:

The superior sagittal sinus, transverse and sigmoid sinuses and proximal portions of the internal jugular veins are normal. Internal cerebral veins, vein of Galen and straight sinus are normal. No filling defect or occlusive lesion is seen.

IMPRESSION:

1. Negative MR venogram of the intracranial structures without gadolinium.

This study was interpreted by an ABR certified radiologist with subspecialty training and additional board certification in neuroradiology. Please call 720-493-3777 with any questions.
